HEALTHCARE TECH

HL7 / FHIR · Health-insurance e-claims · Provider-to-payer switching · Claim deduplication · Clinical data pipelines · MENA payer integrations

BACKEND

Node.js · NestJS · Express · TypeScript · JavaScript · PHP · REST APIs · Microservices · System design

DATA & CLOUD

PostgreSQL · MongoDB · Docker · AWS · Git

AI

LLMs · RAG · Embeddings · NLP · AI-powered backends

PROFILE

Software engineer working where backend engineering meets healthcare. At Kayan Healthcare Technologies I build and operate the middleware switch that carries FHIR health-insurance claims from providers to payers, and I own fixes on it end to end. My background is in scalable Node.js / NestJS server-side systems, and I'm extending that into AI-powered backends. Alongside engineering, I teach: I create Arabic content on AI and software for LinkedIn, YouTube and Instagram, and I support job seekers as a TAP Ambassador.

EXPERIENCE

Mid-Level Software Engineer & Integration Officer

Aug 2026 – Present

Kayan Healthcare Technologies · Remote (Dubai-based)

- Develop and operate the Kayan middleware/switch that routes FHIR-based health-insurance claims from healthcare providers to payers.
- Act as integration officer between the platform and payer systems, owning interoperability and onboarding issues.
- Implemented claim deduplication on the switch to stop duplicate submissions reaching payers.
- Work on HL7/FHIR interoperability and e-claims automation for healthcare markets across the MENA region.

Backend Engineer

Sep 2025 – Jul 2026

Kayan Healthcare Technologies

- Built and maintained backend services for the claims platform; promoted to mid-level after one year.
- Joined as an intern in Aug 2025 and moved to a full backend role within a month.

Backend Developer

Before Kayan

DigiFly Group

- Designed and built RESTful APIs and server-side applications with JavaScript, TypeScript, Node.js and NestJS.
- Focused on performance, code quality and production-ready delivery from concept to deployment.

Co-Founder

Earlier venture

HolyLandCoffee

- Co-founded a coffee brand and built its website.

COMMUNITY & CONTENT

- TAP Ambassador (since Jan 2026) — community role helping job seekers land roles in tech.
- Content creator — Instagram Reels explaining AI concepts (LLMs, NLP, embeddings) in Arabic; LinkedIn audience of 5K+; YouTube channel

ALSO WORKS WITH

Python (data viz) · Java (DS & algorithms)
